

Patrick B. Lucas

Shelton, CT | 203-993-0960 | patrick.b.lucas@gmail.com | patrickblucas.github.io/Portfolio

Operations leader with 10+ years of experience across procurement, inventory management, ERP systems, and multi-site logistics in construction materials distribution. Builds full-stack tools and structured processes to close operational gaps, turning manual, error-prone workflows into systems that produce consistent results regardless of who runs them. Led operational evaluation of an enterprise ERP rollout, rebuilt a 1,100+ SKU procurement operation from scratch, and manages a \$2M inventory portfolio supporting \$10M+ in annual facility revenue.

CORE COMPETENCIES

- ERP Systems:** ERPLY, JD Edwards EnterpriseOne, APlus/AS400, SAP S/4HANA (in progress)
- Supply Chain & Inventory:** Demand Forecasting, Multi-Site Materials Flow, JIT Fulfillment
- Full-Stack Development:** React, Node.js, PostgreSQL, Google Apps Script
- Procurement & PO Lifecycle:** Landed Cost Analysis, Vendor Management, Margin Protection
- Process Design:** Root-Cause Analysis, SOP Development, UAT & Defect Documentation
- Operations Leadership:** Team Management, OSHA Compliance, Payroll Administration

PROFESSIONAL EXPERIENCE

Senior Operations & Systems Manager2019 – 2026

O&G Industries – Waterbury, CT

Connecticut's largest privately-held construction company, a national Top 400 Contractor. 7-location building materials division; managed facility supports \$10M+ annual revenue.

- Assigned by the Executive Vice President to lead operational evaluation of a division-wide ERPLY rollout; authored a 25-page implementation roadmap documenting 40+ system gaps and process recommendations, later designated ERPLY super-user with full admin access
- Rebuilt entire procurement operation for 1,100+ SKUs across five vendor relationships after a critical purchaser departure with no transition plan; built a full-stack ordering application cutting PO cycle time from 3-5 days to under 15 minutes
- Diagnosed and resolved recurring six-figure pallet inventory losses by identifying five distinct, compounding process failures; designed and delivered a training- and process-based SOP adopted company-wide
- Manage a \$2M inventory portfolio; conduct forensic inventory investigations combining live recounts, ERP history audits, and video surveillance to identify discrepancies and recover financial exposure
- Orchestrated \$900K+ in multi-vendor construction logistics across 97 confirmed truckloads with zero delays attributable to load planning or customer communication
- Led emergency response after a delivery driver downed live power lines, igniting a load; secured the area, contacted emergency services, and rerouted traffic on a major public thoroughfare until responders arrived
- Built a full-stack ERP platform (React, Node.js, PostgreSQL) covering the complete procure-to-pay and buy-to-cash cycle for a sister company with zero prior digital infrastructure
- Authored internal training and reference guides used to onboard new hires, translating complex product lines and system procedures into structured, plain-language documentation
- Serve as an informal cross-location systems resource, resolving APlus and account configuration issues for other facilities outside formal role scope
- Maintained OSHA compliance through monthly inspections and proactive hazard identification; multiple years with zero lost-time incidents

Assistant Operations Manager2017 – 2019

O&G Industries – Bridgeport, CT

- Managed daily warehouse operations at a high-volume regional consolidation facility distributing tools and specialty items to 7 company locations
- Identified that warehouse layout followed retail-exposure logic rather than pick-efficiency logic; quantified the cost on a single high-velocity SKU, then applied 80/20 Pareto analysis to systematically reposition SKUs by velocity
- Diagnosed a root-cause formula error affecting a vendor product line following an acquisition, causing failed applications and absorbed customer costs; restructured formulas and built a mixing protocol that eliminated the mismatches
- Authored a 7-page company-improvement proposal spanning warehouse slotting, product labeling, demand forecasting, and process automation; presented directly to ownership, resulting in promotion

Inventory Control Specialist2015 – 2017

O&G Industries – Stamford, CT

- Managed inbound/outbound gate operations, Bill of Lading verification, and full physical inventory counts for a dedicated warehouse
- Given a broken hand tool and no workstation to assemble product; built a complete mobile assembly station from scratch and sourced better tooling, increasing throughput roughly 10x

SELECTED SYSTEMS & TOOLS BUILT

- NEBP-ERP** – Full-stack ERP (React/Node/PostgreSQL) covering procurement, inventory, and AR/AP for a company with no prior digital infrastructure
- O&G Material Calculator** – Intranet-hosted PWA with 11 calculator modules for hardscape material estimation; built in under one week
- Orgill Orderer** – Demand forecasting and ordering automation across 880+ SKUs, cutting order time from days to minutes
- Hardware & Vendor Order Recommendation Engines** – Cross-warehouse sell-through analysis generating item-level transfer and reorder recommendations
- Truck Load & DOT Compliance Planner** – Live per-pallet weight tracking against DOT limits, eliminating overweight load rejections
- ThriveMetrics** – Personal fitness PWA (React, Supabase, Vercel) with AI-coached reporting across 6 integrated data sources

EDUCATION

B.S. Business Management, Summa Cum Laude2018

Southern New Hampshire University – GPA: 3.96 – President's List, all 10 terms enrolled

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- SAP S/4HANA, Supply Chain & Operations Management – In Progress
- Google Data Analytics Professional Certificate – Excel, SQL, R, Tableau
- OSHA Forklift Certification – Current
